SKILLS

Front-End: React, Redux, Zustand, JavaScript, TypeScript, HTML5, CSS3, Next.js, Bootstrap, Tailwind, Shadcn

Back-End: Firebase, Firestore, Node.js, Express.js, MongoDB, PostgreSQL, Supabase, Git,

WORK EXPERIENCE

EnspireMedia

Redding, CA (Remote)

Full Stack Developer

Oct 2022 - Present

- Tech stack: Javascript, React, Redux, Node.js, Firebase, Firestore, Express.js
- Developed and deployed 6 React.js/Node.js applications, utilizing features such as Hooks and Redux for state management, aligning with industry best practices
- Integrated RESTful APIs in React applications, enabling dynamic data handling and robust application functionality.
- Authored comprehensive technical documentation for React components and application architecture, facilitating easier maintenance and onboarding of new team members.
- Developed responsive web applications using React.js and Bootstrap, ensuring compatibility across various devices and browsers.
- Participated in Agile/Scrum development cycles, contributing to sprint planning, daily stand-ups, and retrospectives, ensuring timely delivery of project milestones.
- Integrated various third-party services and APIs (like QuickbooksAPI for accounting, MapboxAPI for location services) into React applications, enhancing functionality and user experience.

JS Consulting

Temecula, CA (Remote)

Full Stack Developer

Jun 2022 - Present

- Tech stack: JavaScript, Typescript, React, Node.js, Redux, Node.js, Firebase, Firestore, Express.js, Zustand, Supabase
- Developed modern and user-friendly websites and applications for small businesses using React/Node.js, ensuring a strong online presence.

Projects

MobileTrack Dispatch

Full Stack Developer

- Tech stack: React, Redux, Next.js, Node.js, Express.js, Firebase, Firestore
- Developed a React/Redux business application for dispatch companies, streamlining operations such as scheduling, accounting, dispatching employees, and managing customer and employee records. Included dynamic data visualization through visual graphs.
- Integrated the QuickBooks API for seamless data exchange, enhancing accounting functionalities.
- Organized company data into an interactive dashboard, providing a consolidated view of critical business metrics.
- Implemented real-time employee and job tracking using the MapBox API, improving location monitoring and operational efficiency.
- Developed a streamlined method for creating work orders, invoices, and managing payments, enhancing overall business workflow and customer service

TimberTrack

Full Stack Developer

- Tech stack: React, Redux, Next.js, node.js, Express.js, Firebase, Firestore
- Developed a React/Node.js business application for timber companies, streamlining operations including inventory management, profile record management, contract generation, and dynamic data visualization through visual graphs.
- Enhanced document management by adding functionality to generate PDFs for invoices, receipts, and reports.

MobileTrack Maintenance

Full Stack Developer

- Tech stack: React, Redux, Next.js, Node.js, Express.js, Firebase, Firestore
- Implemented real-time messaging for seamless user communication, including attachments for enhanced efficiency.
- Collaborated on the schedule component, integrating intuitive drag-and-drop and click features for optimized user interaction and scheduling flexibility.
- Engineered a sophisticated activity tracking system, offering users comprehensive activity logs for enhanced business insights.

EDUCATION

DigitalCrafts

Atlanta, GA (Remote)

Full Stack Software Development Program

March 2022 - Sep 2022

- Engaged in an immersive course encompassing HTML, CSS JavaScript, and Python, with a focus on implementing cutting-edge frameworks like React/Redux. Additionally, delved into server-side technologies including Node.js, Express, and SQL.
